

### Transparent

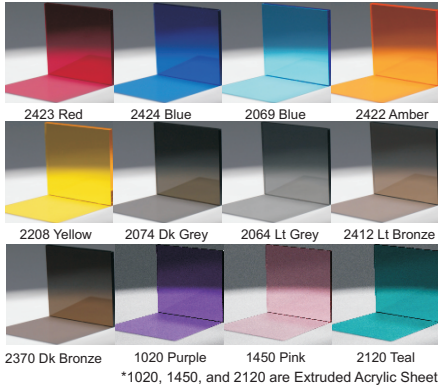

Vibrant Colors

Cell-Cast Sheet

Ideal for Laser Cutting & Engraving

Transparent Acrylic sheet is sheeting that is colored but is *easily seen through*; i.e. 2423 Red will look like red tinted glass.

Transparent acrylic sheet is a great fit for any application that requires color sheet that is still able to maintain sight lines.

### Translucent

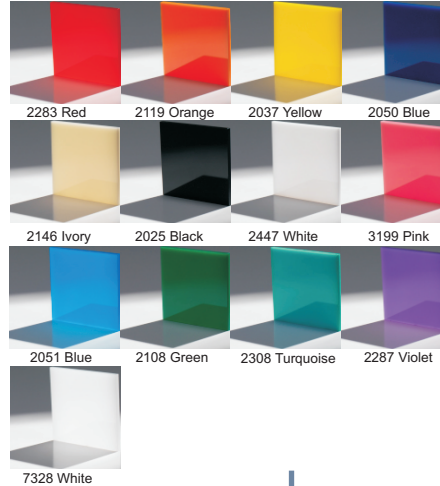

Sign-Grade Material

Cell-Cast Sheet

Ideal for Laser Cutting & Engraving

Translucent Acrylic sheet is sheet that is colored but is *not seen through* but allows light transmission; i.e. 2283 Red will have a red glow (when lit) but you will not be able to see objects on other side of sheet.

Translucent Acrylic is sometimes referred to as "Sign Grade" material as it is typically used for back lighting applications.

### Fluorescent

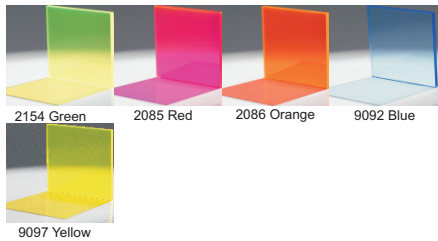

Edges Glow

Cell-Cast Sheet

Ideal for Laser Cutting & Engraving

Fluorescent Acrylic sheet is a speciality sheet that is colored like Transparent Acrylic, but have edges that glow. The sheet transmits lighting (whether sunlight or room light) to create a edge glowing effect. This sheeting is a favorite among laser cutting& engraving shops

### Color Frost

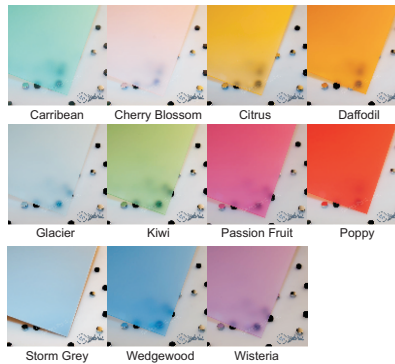

Light Diffusing Frost

Cell-Cast Sheet

Ideal for Laser Cutting & Engraving

The Color Frost acrylic sheets are specialized soft hue colors that feature P95 frost on one side and standard gloss finish on the other side of the sheet. These are unique colors that allow for flexibility when it comes to color offering and functionality with lighting applications.

### Color & Clear Mirror

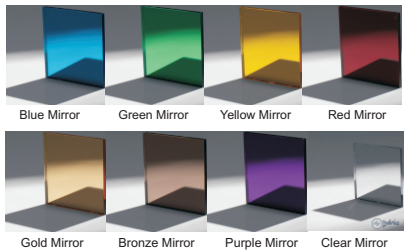

Identical to glass mirror

Extruded Acrylic Sheet

Ideal for large coverage areas

Mirrored Acrylic sheet is manufactured to be identical in appearance to regular glass mirror. Mirrored Acrylic has the advantage of far less weight than glass mirror, making it ideal for large coverage areas and any application a very unique type of sheet is required.

### Plastiblurs

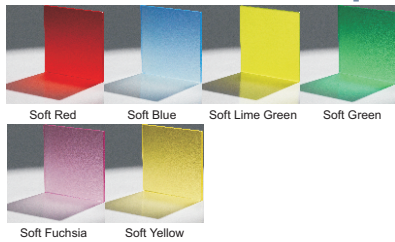

Light Diffusing Frost

Cell-Cast Sheet

Ideal for Laser Cutting & Engraving

The Plastiblurs are highly specialized Cell Cast Acrylic sheet colors that have pastel hued appearances and have frost on *both* sides of the sheet. Plastiblurs are the perfect option for unique colors with the advantage of double sided frost (PP95)
